

SAMMEYAK WANKHADE

Software Engineer Intern — Full Stack Developer

+91 87998 23842 — wankhadesammeyak@gmail.com — LinkedIn — GitHub

SUMMARY

Full Stack Software Engineering undergraduate with hands-on experience building and maintaining production-grade web applications using **NestJS, Angular, MongoDB, and TypeScript**. Experienced in developing scalable backend services, integrating **GraphQL APIs**, implementing scheduled jobs, and delivering UI improvements for real-world clients. Seeking **Software Development Engineer (SDE)** roles.

EDUCATION

Sinhgad College of Engineering, Pune

Aug 2022 – Jun 2026

Bachelor of Engineering (B.E.) in Information Technology **CGPA: 8.60/10**

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Java, Python
Frontend: Angular, HTML, CSS, SCSS
Backend: Node.js, NestJS, REST APIs, GraphQL
Databases: MongoDB, MySQL
Tools & Technologies: Git, GitHub, Shopify API, Cron Jobs, AWS (EC2, S3 – Basic Exposure)

EXPERIENCE

Software Engineer Intern

Feb 2026 – Present

Cooee (UK-based Startup)

- Developed and maintained production features using **NestJS, Angular, MongoDB, and TypeScript** in a full-stack environment.
- Implemented a **cron-based bundle generation system** running at 30-minute intervals to automate data processing workflows.
- Integrated **Shopify GraphQL APIs** to extract and persist store metadata including address and country information.
- Executed **database migration scripts** to ensure data consistency across evolving schemas.
- Resolved critical bugs including **trial extension failures** and incorrect **revenue calculations** in admin dashboards.
- Delivered **50+ UI improvements** for enterprise clients, enhancing usability and user experience.
- Built new features including a **summary table row** to improve data visibility and reporting.

PROJECTS

Scalable URL Shortener with Analytics | *Flask, MongoDB, Redis* [Code](#) | [Live](#)

Jan 2026

- Built a scalable backend service for authenticated URL shortening and redirection.
- Implemented **Redis caching (TTL)** to reduce database hits and improve redirect performance.
- Developed analytics APIs to track clicks, timestamps, and user activity.
- Secured endpoints using **JWT authentication** with user-level access control.

ThinkBoard – Multi-user SaaS Backend | *Node.js, Express.js, MongoDB, Redis* [Code](#) | [Live](#)

Nov 2025

- Designed REST APIs for a multi-user platform supporting secure CRUD operations.
- Implemented **rate limiting using Redis** to handle high-traffic scenarios.
- Optimized MongoDB queries to improve response time for read-heavy endpoints.
- Integrated **JWT-based authentication** for secure session management.

Real-Time Messaging System | *Flask, WebSockets, Docker* [Code](#) | [Live](#)

Aug 2025

- Developed a WebSocket-based messaging system achieving **sub-100ms latency**.
- Reduced server load by **50%** by replacing HTTP polling with persistent connections.
- Containerized the application using Docker for consistent deployment environments.

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) 2025 Certified Foundations Associate
